In 2024, a new solar project was installed every 54 seconds, totaling 5,561,319 solar energy systems in the U.S. 12 Solar has added the most generating capacity to the grid for the last five years.

o At the end of 2024, solar was the second-largest source of U.S. generation capacity, though still a growing percentage of the U.S. electric generation mix. o In 2024, solar represented ...

Find up-to-date statistics and facts on the global solar photovoltaic industry.

Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt ...

More than 35 newly operational solar factories have been announced since the passage of the IRA, resulting in more than \$3 billion in investments and creating 9,500 American jobs.

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

American Solar Deployment Grows at Record Pace Solar has seen massive growth since 2010. There are now 262 gigawatts direct-current of solar capacity installed nationwide, enough to power 45 ...

The photovoltaic solar energy sectors play a critical role in transitioning toward sustainable energy solutions. Each sector, whether utility-scale, commercial, residential, or off-grid, ...

This article compiles U.S. solar industry statistics, covering capacity generation, installed megawatts, employment figures and future projections.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...
