How do you install solar panels on a roof?

Begin by installing the mounting brackets. These brackets anchor the solar panels to your roof securely. Space them evenly across your roof, following the manufacturer's guidelines for optimal support. Once the brackets are in place, attach the rails. The rails hold the panels and ensure they remain in position.

How do I prepare my roof for solar?

Proper roof preparation for solar is a critical step in the installation process. Before you begin, evaluate your roof's strength and condition to ensure it can support the weight of solar panels. Assessing your roof's strength and condition involves inspecting for signs of wear and tear.
