What to Do If Your Solar Panel Isn't Outputting Power as Expected
A clamp meter, sometimes called an ammeter, can measure the level of current flowing through a wire. You can use one to check whether or not your solar panels are outputting their expected number of amps. A clamp meter makes solar panel testing incredibly quick and convenient because you don't have to disconnect your panels in order to check them. See more on footprinthero .b_imgcap_alttitle p
