Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW,...

Huawei has filed a patent for a new type of solid-state electric vehicle (EV) battery that could significantly change the future of clean transportation. The technology promises a driving range ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast ...

Even though Huawei doesn't manufacture batteries, the company is putting plenty of R& D resources into developing a new solid-state battery tech. The newest patent reveals a battery pack that can go for ...

Chinese telecom giant Huawei has filed a patent for a sulfide-based solid-state battery that claims to deliver a driving range of up to 3,000 kilometers (about 1,860 miles) with full charging in just ...

Huawei has filed a patent detailing a sulfide-based solid-state battery design with energy densities between 180 and 225 Wh/lb, roughly two to three times higher than today's typical...

Huawei's claims of a 3,000-kilometre range and a five-minute charge have drawn a lot of attention, but experts warn that these figures are only theoretical and would require charging ...

The patent filed by Huawei for a solid-state battery capable of a theoretical 3,000 km range and 5-minute charging signals a pivotal moment for the electric vehicle (EV) industry.

According to reports, the Chinese tech giant has submitted a patent application for a solid-state battery that could provide almost 3,000 kilometres, or 1,864 miles, on a single charge. This ...

Among them is Huawei, which has patented a sulfide-based solid-state battery capable of delivering driving

Huawei solid-state battery module pack

ranges of up to 3,000km and ultra-fast charging in just five minutes.
