The Stephenstown battery storage plant will provide critical system services to help ensure a smooth flow of electricity into the grid, as Ireland continues its transition into renewable energies.

Electricity Supply Board (ESB) officially opened its 75MW/150MWh battery energy storage system (BESS) in Dublin last week (7 February), making it the largest project of its kind in ...

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies have been ...

Ireland takes a leap towards clean energy with its largest battery storage facility. Explore the benefits of this 150 MWh project.

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We have deployed fuel cell units as part of the first phase ...

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

Located in County Meath, in the east of the country, the Gorman system is made up of more than 4,000 modules in 16 containers, which occupy an area the size of a football pitch. The project, the first of its ...

VPI has a growing presence in Ireland and is harnessing our extensive experience in thermal generation and energy storage to support the country's net zero ambitions.

ESB has opened a 75 MW/150 MWh battery plant, touted as the largest of its kind in commercial operation in Ireland. Eamon Ryan, the country's Minister for the Environment, Climate and...

Ireland Phase Change Energy Storage System Manufacturing Plant

The Ballynahone Long Duration Energy Storage (LDES) project, proposed by FuturEnergy Ireland Development DAC (the Applicant), aims to provide long-term energy storage to support the ...
