President Donald Trump said the U.S. will not approve wind or solar power projects. Trump has tightened federal permitting for renewables with Interior Secretary Doug Burgum now ...

Federal agencies are delaying approvals for renewable energy projects on both federal land and private property at a time when electricity demand is going up.

Some are outright prohibitions on the siting of new wind turbines, others restrict the setback distance a wind turbine can be placed from a feature based on sound, distance, or a ...

A federal judge has struck down President Donald Trump's executive order blocking wind energy projects, saying the effort to halt virtually all leasing of wind farms on federal lands and waters was ...

A nationwide analysis by USA TODAY shows local governments are banning green energy faster than they're building it. At least 15% of counties in the U.S. have effectively halted new ...

Across America's power grid, there's a growing gap between what we need and what we'll allow. As the planet warms and climate disasters grow more costly, the U.S. has set a target to reach ...

Local authorities typically control siting standards. Solar or wind projects must meet standards to manage land use and regulate their development and construction. For example, there ...

Understand the complexities of siting and permitting wind energy projects, including federal and state regulations, environmental reviews, and strategies to address community concerns and opposition.

An executive order freezing all wind energy projects - both on land and sea - has been struck down by a US judge.

Is it not allowed to build wind turbine power plants

Across America, local bans, moratoriums and construction impediments are blocking wind and solar energy with increasing levels of red tape. Here's what USA TODAY's analysis found.
