The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Astoria Energy II is an independently owned facility that has entered into a 20-year supply agreement with NYPA to service its New York City governmental customers.

There are four new solar projects in New York, adding about 27 megawatts to the state's grid, as the renewable energy source continues to be the cheapest way to bring more capacity online.

Whether you're a solar enthusiast, an environmental advocate, or just curious about renewable energy, our interactive map provides detailed information on the growing network of solar installations.

This map displays information on location, fuel type, electric generation, generating capacity, ownership, and emissions for over 10,000 power plants across the country.

Here is a map of all utility-scale solar farms in New York. Hover over a solar farm to view information on each project like their name, capacity and construction date.

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

Gain a holistic view of the solar installed in New York State. Discover installed capacity, number of projects, and annual trends for completed projects through aggregated data from NYSERDA, NYS ...

The 500 MW Cider Solar Farm, which is to be the largest solar plant in New York State, was approved by the New York Office of Renewable Energy Siting and Transmission (ORES).

Small-scale solar including customer-owned photovoltaic panels delivered an additional net 4,526 GWh to

Is there a solar power station

New York's electricity grid in 2024. This was about 33 percent more than the amount generated by ...
