The EPA plan would eliminate existing limits on greenhouse gas emissions from coal and gas-fired power plants, a move which would continue the pollution that's driving climate change.

The Trump administration announced Wednesday that it's revoking limits on power plants' climate pollution -- removing the cornerstone of a decadelong strategy to douse one of the nation's ...

EPA is planning to propose new rules to improve the management and recycling of end-of-life solar panels and lithium batteries.

Waste from solar photovoltaic (PV) panels will be collected, treated and recovered at the expense of manufacturers, following a vote by energy ministers meeting in Brussels today (4 March...

Two key U.S. House committees this week advanced a tax plan that effectively ends incentives for clean energy and electric vehicles, undermining an American-made energy boom while ...

The Trump administration is preparing to terminate \$7 billion in federal grants intended to help low- and moderate-income families install solar panels on their homes, according to two people...

A new analysis finds that more than \$14 billion in clean energy projects in the U.S. have been canceled this year.

More than 20 states sued the EPA on Thursday, challenging its cancelation of a \$7 billion program that aimed to make solar power accessible to low-income households.

The Trump administration has announced several regulatory rollbacks designed to curb limits on power plant emissions, along with cutting protections for air and water quality.

Latest on lifting of ban on pollution from photovoltaic panels

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...
