How much solar power does Lego have?

Since 2022,LEGO has added 22 MWpof solar energy capacity,with some of the most notable developments taking place in Czechia and Denmark. In Kladno,Czechia,LEGO increased its renewable energy capacity by 150% in one fell swoop,focusing on onsite solar power generation.

How many MWp of solar energy will Lego Group produce?

Under its new plans,LEGO Group said that infrastructure to produce approximately 38 MWpof solar energy - a capacity increase of 72% - are due to be built across its production sites.

Will Lego increase its solar capacity in 2025?

By the end of 2025,the company aims to add another 37.97MWp across its production sites,representing a 72% increasein its solar capacity. One of the most significant developments is taking place in Ny&#237;regyh&#225;za,Hungary,where LEGO plans to triple its existing solar capacity.

What does Lego's solar expansion mean for the environment?

According to LEGO,the company's solar expansion forms a key initiative towards the company's climate goals,which include achieving net zero greenhouse gas (GHG) emissions by 2050,and an interim target to reduce emissions by 37% by 2032. In a statement announcing the new plans,LEGO Group said:

Since 2022, LEGO has added 22 MWp of solar energy capacity, with some of the most notable developments taking place in Czechia and Denmark. In Kladno, Czechia, LEGO increased ...

Lego also said it has installed over 12,400 rooftop solar panels at ...

The LEGO Group is working on a series of solar-powered tech expansions this year that are a key part of its ongoing sustainability push to achieve net-zero greenhouse gas emissions by 2050.

LEGO Group aims to boost solar energy use by over 70% by 2025. Join the journey towards a sustainable future!

The LEGO Group announced plans to scale up its use of renewable energy, with an anticipated increase of

72% in solar capacity globally this year. According to LEGO, the company's ...

Lego also said it has installed over 12,400 rooftop solar panels at its new factory in Vietnam, opening this year. That site is predicted to have a total solar power capacity of around 7.34 ...

Increased solar capacity by 61 percent globally over the past two years Solar panels installed across 6 LEGO factory sites Plans to further increase solar capacity globally by 72 percent in 2025 Solar ...

The LEGO Group's ongoing efforts to expand its solar energy capacity and reduce emissions highlight its dedication to a more sustainable future for both the company and the next ...

Net-zero emissions target by 2050, with a 37% reduction goal by 2032. LEGO Scales Up Renewable Energy LEGO has ramped up its solar power efforts, adding 22 MWp of capacity globally ...

With these new solar panels, the company has more than doubled the total renewable energy generated at the factory - increasing from an existing 1 MWp of energy generated by previously-installed solar ...

As Hungary's solar power generation continues to grow, initiatives from major companies play a crucial role in stabilizing the grid, often complemented by emerging technologies like large ...
