Qair announces the closing of a new loan to support the implementation of a hybrid solar and battery storage project in Mauritius.

Under the 2022-2023 national budget, the government committed to initiatives including setting up 140MW of hybrid renewables-plus-storage facilities with private entities, investment in ...

With integrated battery storage, the facilities are expected to deliver a consistent energy output for at least 12 hours a day, mitigating the intermittency challenges associated with solar power ...

In an exciting development for renewable energy in Africa, Qair, an Independent Power Producer (IPP), has successfully closed a loan to finance a significant 60MW hybrid solar ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, marking a significant stride towards its ambitious goal of ...

Mauritius is accelerating its clean energy transition by opening a tender for solar projects with a combined capacity of 80 MW, including integrated battery storage systems. ...

As Mauritius transitions to a low-carbon economy, the CEB is actively integrating Battery Energy Storage Systems (BESS) to manage fluctuations in renewable energy sources like solar and wind.

The 20 MW BESS, to the tune of Rs 700 million, was supplied, installed and commissioned by SIEMENS France, a world leader in industrial electrical and electronic systems ...

The meeting focused on the progress of Qair's innovative STOR"SUN projects facilitated by the EDB. These hybrid plants integrate photovoltaic panels (PV) with battery energy storage ...

Mauritius energy storage battery investment

Qair International has secured financing for the landmark 60 MWp Henrietta solar project in Mauritius, a move that establishes the country's largest solar and battery storage initiative.
