Mexico's renewable energy sector has presented a growing trend in recent years. During the last decade, the country's primary production of renewable energy remained relatively stable,...

The projects include 23 solar photovoltaic and 11 wind power plants across 20 states, scheduled to begin operations between 2027 and 2030. Combined, they will add 5.97GW of installed ...

Mexican President Claudia Sheinbaum has unveiled a \$23.4 billion plan to expand the national electricity system, targeting 13.02 GW of new capacity by 2030, including 4.67 GW of large ...

Mexico has enormous potential to develop renewable energy projects. The country has high solar radiation, wind capacity, and geothermal sources. In addition, with the right technologies ...

To do so, the CFE plans to develop 7 wind projects, 9 solar PV power plants (673 MW), 5 natural gas-fired CCGT power plants and one internal combustion project (240 MW) over a six-year ...

Private companies will invest US \$4.75 billion to build 20 renewable energy projects across 11 Mexican states, Energy Minister Luz Elena González announced Wednesday. To ...

Historically, the main applications of solar energy technologies in Mexico have been for non-electric active solar system applications for space heating, water heating and drying crops.

Mexico is revising its renewable capacity targets, increasing wind and reducing solar, which could influence the I-REC market.

Explore Mexico's boom in alternative energy. Discover how strategic investments in solar, wind, and geothermal power are shaping the future of clean energy.

Mexico has revised renewable energy capacity addition targets for the short- and long-term period where

Meicuo Solar Power Generation

lowered PV-solar and increased wind capacities could lead to a significant shift in ...
