What does Elon Musk say about China's electricity generation?

(FILES) Elon Musk looks on as US President Donald Trump speaks at the US-Saudi Investment Forum at the John F. Kennedy Center for the Performing Arts in Washington, DC on November 19, 2025. (Photo by Brendan SMIALOWSKI /AFP) Elon Musk warned China's electricity generation, driven by rapid solar expansion, will soon triple that of the US.

Did Elon Musk visit photovoltaic suppliers in China?

Shares of Chinese solar panel makers surged after a team of staff sent by Elon Musk had reportedly visited several photovoltaic suppliers in China.

Does China have a relationship with solar energy?

The graph, depicting the different types of electricity generated by both countries, revealed an interesting fact about China's engagement with solar energy. In his X post dated December 20, Tesla CEO Elon Musk reposted a graphical representation by user @JessePeltan.

Is Musk's interest in solar a sign that tech giants are moving upstream?

"Musk's apparent interest in solar has been read as a signal that tech giants are moving upstream into power," Zong said. "But there hasn't been an immediate shift in fundamentals such as order books -- the move was largely momentum trading and short-covering."

New data on China's relentless energy installations underscore warnings from Elon Musk and Jensen Huang that the nation's world-beating power network will deliver a major advantage over ...

According to Musk, this rapid expansion places China at the forefront of providing the energy resources required for the next generation of power-hungry AI technologies.

Elon Musk says China's electricity generation, led by solar, will surpass America by 3X soon. At WEF Davos, he called solar the key to clean energy.

Tesla CEO Elon Musk has rattled markets once again--this time not with electric vehicles or rockets, but with solar power. Reports that Musk's team recently made contact with multiple ...

Musk talks about China s solar power generation

Shares of Chinese solar panel makers surged after a team of staff sent by Elon Musk had reportedly visited several photovoltaic suppliers in China.

He anticipates that China's electricity generation will triple US output in 2026 or 2027. In a post on X on Saturday, Musk highlighted the rapid growth of China's power generation capacity, with ...

Meanwhile, China's solar is public utility-grade: massive fields of photovoltaic cells powering entire provinces. The implication is clear: if the U.S. doesn't treat solar as a matter of national strategic ...

Elon Musk has been influential as a proponent of solar power in the past decade. In several interviews, the Tesla and SpaceX CEO has often expressed his vision of a future powered ...

On June 20, 2025, Elon Musk issued a stark warning via an X post: "Solar power in China will exceed ALL sources of electricity combined in the USA in 3 to 4 years. Wake up call." This statement ...

Elon Musk's remarks highlight how China has rapidly scaled up renewable energy, particularly solar, even as it continues to rely on coal.
