Industry insiders whisper about potential "circular economy tariffs" on panels with low recyclability - think of it as a sustainability entrance fee. While not yet implemented, forward-thinking companies are already adopting ...

The Energy Investment Allowance (EIA) offers a tax advantage if you buy solar panels or solar heat collectors for your company. You can offset 40% of the investment costs against your taxable profit.

The profits of the foreign company, including the profit from the Dutch permanent establishment, are often also subject to taxation abroad. Local legislation or the application of tax treaties usually ensure ...

Are you buying solar panels? Or do you sell or install solar panels? Find out about the VAT requirements for entrepreneurs in the Netherlands.

Income derived by a taxpayer with a solar PV project located in the Netherlands is in principle subject to Dutch income tax. The underlying tax base can, however, be lowered due to certain tax allowances.

Additionally, there are various schemes and subsidies that make investing in business solar panels even more attractive. Below, we outline these schemes and subsidies for commercial and industrial use by businesses ...

The Netherlands has an extensive network of double tax treaties with other countries. These treaties are under constant inspection and being re-negotiated to keep up with developments.

The recent announcement in the 2023 budget that the solar PV panel tax rebate for individuals will be implemented for the 2024 tax year from 1 March 2023 to 29 February ...

One country will levy taxes and the other will provide a tax reduction or exemption. A list of the countries with which the Netherlands has signed a tax treaty is available on the Tax and Customs Administration's
