A groundbreaking step towards sustainable urban mobility, the solar-powered carport at Hauz Khas Village offers fast EV charging, supporting Delhi's green energy initiatives.

"We are thrilled to inaugurate Delhi's first solar-powered EV charging carport along with NSEFI, marking a significant step towards sustainable urban mobility for a greener future.

It provides fast charging for two- and four-wheelers in under an hour, enhancing efficiency for delivery services in urban areas. The project not only promotes sustainable energy use but also ...

Servotech Leads Green Push with Solar-Powered EV Charging Station in Delhi inaugurated Delhi's first grid-connected Solar-Powered EV Charging Carport. This Solar-Powered EV Charging Carport, ...

The system enables fast charging for two and four-wheelers in under an hour, facilitating efficient delivery services in inner-city and confined spaces," said Servotech Power Systems in a...

Philipp Ackermann, German Ambassador to India and Bhutan, recently inaugurated a grid-connected solar-powered EV charging station at Hauz Khas Village Parking Station in Delhi.

NEW DELHI: Researchers at the Indian Institute of Technology, Delhi has developed a modular, scalable, and environmentally friendly smart Electric Vehicle (EV) charging station with...

This Solar-Powered EV Charging Carport was first tested at the Hauz Khas Village parking area. It marks a significant step in improving sustainable energy and electric vehicle infrastructure. ...

While most global V2G initiatives use DC systems, this demonstration validated AC based bidirectional charging, offering a more affordable and scalable solution suitable for Indian conditions.

New Delhi Photovoltaic Container Two-Way Charging

IIT Delhi researchers have developed a truly modular, scalable, and environmentally friendly electric vehicle (EV) charging station with in-built solar photovoltaic (PV) interface capability.
