The River 2 Pro doesn't have the absolute best run time of the portable power stations we tested, and it can't power high-draw appliances such as large air-conditioning units.

We prepared the AEO by using the National Energy Modeling System (NEMS) to project a set of scenarios that, taken together, represent a range of outcomes for the U.S. energy system. AEO2025 ...

The increase in solar and wind power outpaced global electricity demand growth in the first half of 2025. Solar alone met 83% of the rise, with many countries setting new records.

Given the rapid pace of deployment in the first half of the year, our forecast projects a more moderate increase in wind and solar PV installations in the second half of 2025.

Storage installations will grow just under 30% in 2024, but between 2025 and 2028 an annual average growth rate of 10% is expected as early-stage development constraints continue.

This mid-year update follows the extensive Electricity 2025 report released in February, examining the latest trends and the outlook for the remainder of the year.

In 2024, over 30,000 MW of solar capacity came online, which is a 30% increase in operating solar capacity. An additional 34,000 MW are under preparation, testing, or construction and projected to ...

The outdoor PV power supply market is experiencing robust growth, driven by several key factors. The increasing popularity of outdoor activities, coupled with rising demand for reliable ...

This report provides a comprehensive assessment of recent tariff adjustments and international strategic countermeasures on Outdoor Power Supply cross-border industrial footprints, capital allocation ...

Outdoor power supply in the second half of 2025

The Outdoor Power Supply market is poised for significant growth, driven by the increasing need for reliable and resilient power solutions in outdoor environments.
