D3Energy is a leading developer of floating solar. Floating solar has become a premier way to create renewable energy while saving land and improving water.

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal linksThe Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave National Preserve

The concept of photovoltaic panels on the roof of the cave might sound like science fiction, but it's sparking serious conversations in renewable energy circles.

In 2023, Cave of the Mounds installed two solar arrays alongside our restored prairie. These solar panels provide energy to the Cave Entrance Building, the Visitor Center, and the cave itself, and they ...

Photovoltaics companies include PV capital equipment producers, cell manufacturers, panel manufacturers and installers. The list does not include silicon manufacturing companies.

Since our panels started rolling off our assembly lines in February, we've seen significant interest from energy companies looking to use our Ohio-made panels as well as from Ohioans ...

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

Innovations in solar technology, including portable solar panels and compact energy storage systems, empower researchers to conduct their work in some of the most remote and ...

Photovoltaic panel manufacturers installed in caves

Traditional silicon-based solar panels typically rely heavily on direct sunlight, which may not be abundant within caves. Therefore, thin-film solar cells emerge as an attractive option due to ...
