Our cutting-edge research focuses on boosting solar cell conversion efficiencies; lowering the cost of solar cells, modules, and systems; and improving the reliability of PV components and ...

Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. Explore the many factors to consider when selecting a site.

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

We use Google Earth imagery to analyze your roof shape and local weather patterns to create a personalized solar plan. Adjust your electric bill to fine-tune your savings estimate and the ...

Join the Sunhub community, your one-stop shop for all things solar. Buy, Sell & Trade solar panel equipment.

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...

Learn how to create solar site plans and module layout drawings for roof and ground-mounted systems. Get faster quotes and streamlined permitting. View samples.

Learn about installing and generating your own clean energy for your home with solar and home batteries.

PVGIS provides information on solar radiation and photovoltaic system performance for any location in the world except the North and South Poles.

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...
