How much do commercial solar panels cost?

Solar panels for businesses. Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a solar panel installation cost?

A 6- to 10-kW solar panel installation costs \$12,600 to \$31,500 after the 30% federal tax credit. Solar panel prices depend on the size, type, and quality. *Total cost may be lower with additional state and local incentives. Get free estimates from solar panel installers near you. Residential solar panel prices vary from state to state.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

How much does a monocrystalline solar system cost?

For a 2,500 sq. ft home, expect to pay \$31,000-\$33,000 (\$21,700-\$23,100 after tax credit) for an 8-9kW system. At this size, spending more on efficient monocrystalline panels often makes sense because you can generate more power with fewer panels.

Thinking of switching to solar? See how much panels cost in your state and how your energy usage and local solar subsidies will affect costs.

Solar panels cost about \$30,500 on average--but often pay for themselves several times over through 25-30 years of electricity savings.

Solar panels cost \$3.00 to \$4.50 per watt installed on average, with homeowners spending about \$3.75 per watt before factoring in available solar incentives.
