How to open a charging station in Indonesia?

There are four steps involved in opening a charging station in Indonesia: Set up a PT PMA company. Acquire land where you'll operate the charging station. Import charging station equipment. This can be done using an Importer of Record. Apply for Location and Operating License.

Can a charging station be a real estate company in Indonesia?

Alternatively, you can hand over the operation of the charging station to the Indonesian national energy company (PLN). This allows for easier licensing since you would be treated as a real estate company. The main requirement is that your station must be larger than 42 m² and PLN will be in charge of operating it.

How many public electric vehicle charging stations did PT PLN build?

PT PLN constructed 54 new Public Electric Vehicle Charging Stations (SPKLU) throughout 2023. This expansion brought the total number of SPKLUs to 624, spread across 411 different locations in Indonesia, all established by the state-owned electricity company. The opportunity for foreign investors?

Will electric cars take over Indonesia?

Indonesian EV industry is still in its infancy, but for similar reasons why electric cars are succeeding in China - including government subsidies and environmental concerns - they will eventually take over Indonesia. PT PLN constructed 54 new Public Electric Vehicle Charging Stations (SPKLU) throughout 2023.
