With 96% of its electricity demand met domestically in 2023 [1], Morocco isn't just playing the energy game; it's rewriting the rules. Let's unpack how their latest moves could reshape North ...

Rabat's government has introduced strict photovoltaic energy storage ratio requirements to stabilize the grid amid rapid solar adoption. Key policies include: A minimum 20% storage capacity for all new ...

The Office National de l'Électricité et de l'Eau potable (ONEE) has initiated a battery energy storage project with a total capacity of 1600 megawatt-hours (MWh) to strengthen the stability of Morocco's ...

You know, when we talk about energy storage, most people think of lithium-ion batteries or pumped hydro. But what if I told you Rabat's energy storage policy is rewriting the rulebook entirely?

"The Future of Energy Storage" report is the culmination of a three-year study exploring the long-term outlook and recommendations for energy storage technology and policy.

Updates to the 25D residential solar tax credit, which covers solar panels, solar water heaters and related property like home battery storage systems, have significantly shortened the timeline for ...

By next year, Rabat could host North Africa's first storage-as-a-service model--where consumers pay per kWh stored rather than owning hardware. It's like Spotify for electricity, if you will.

Source: International Energy Agency (IEA) . A detailed pre-feasibility analysis conducted for a German fuel and gas distribution company exploring the possibility of importing green hydrogen ...

The agreement aims to implement integrated projects for the production of electricity from renewable energies, as part of the government's efforts to strengthen energy efficiency in Morocco, ...
