Andrew Higgins talked to residents of Gornje Nedeljice, Serbia, the site of a planned lithium mine, and protesters in Belgrade, the capital, who are opposed to the project.

Battery recycling is perhaps Serbia's most immediate entry point into the battery-materials economy. Europe faces a surge in production scrap as gigafactories ramp up, and a second surge beginning in ...

As Serbia navigates its energy landscape, the integration of battery energy storage systems (BESS) is emerging as a pivotal strategy for enhancing grid stability and fostering economic ...

Thousands filled the streets of the Serbian capital Belgrade on Saturday to protest plans to mine one of Europe's largest deposits of lithium.

Lithium has been touted in Serbia as a solution for various issues, from electromobility to renewable energy storage. However, experts from EPS (Electric Power Industry of Serbia) express ...

Investments in battery energy storage systems (BESS) is ramping up around the world and Serbia is now making its first steps.

The element missing from Serbia's energy landscape--the one that will ultimately determine the success of the renewable transition--is large-scale energy storage. Batteries will not ...

A gigawatt-scale factory producing lithium iron phosphate (LFP) batteries for the transport and stationary energy storage sectors could be built in Serbia, the first of its kind in Europe.

Yet Europe's domestic lithium supply remains fragmented, marginal, and politically delicate, making Serbia's lithium deposits one of the most consequential yet unresolved variables in ...

Discover how the Jadar mine in Serbia is transforming lithium mining, boosting clean energy, sustainable

Serbia lithium battery energy storage

practices, and Europe's industrial development.
