What is a V7 rackmount ups?

V7 Rackmount UPS units are designed to protect server and networking equipment in distributed and Edge IT applications. With 2U convertible rack/tower format, this 1500VA UPS offers reliable protection from downtime and damage caused by power spikes, swells and brownouts.

What is a 1500 volt ups rated for?

1500VA UPS Extended Runtimes: in an online UPS the inverter section is rated for continuous running and this means that the UPS will have a rear panel socket to which to connect battery extension packs which can be used to increase the runtime.

How much battery runtime does a 1500 volt ups provide?

Battery runtime is load dependent. A typical 1500VA UPS can provide 3-9 minutes runtime at full load. The amount of battery runtime increases as the load on the UPS reduces. This is what some UPS runtimes are quoted at 100%/50%/25% load.

What applications require a 1500va ups?

Typical loads requiring a 1500VA UPS include high-end computer applications, graphic workstations, file servers and CCTV systems. Please contact our projects team for further information or guidance when selecting a 1500VA UPS.
