Shanghai is set to ease winter power demand and reduce costs with the launch of the first phase of Tesla's grid-side energy storage project later this year.

Tesla will build China's largest grid-side battery storage plant in Shanghai. The \$556 million project, involving over 100 Megapacks, aims to stabilize China's urban power grid.

Tesla's \$557 million agreement to build a grid-scale Megapack energy storage station in Shanghai represents more than just another infrastructure project--it's a strategic leap into China's ...

Tesla's first China grid-scale battery storage station using its megapack batteries will be located in Shanghai, local media Yicai reported on Friday.

Utility-scale battery energy storage systems help electricity grids keep supply and demand in balance. They are increasingly needed to bridge the supply-demand mismatch caused by ...

Tesla, China Kangfu International Leasing, and the Shanghai Municipal Government signed a cooperation agreement to build an energy storage power station, which will become Tesla's ...

On 1 January 2026, Wujing Power Plant announced that Shanghai's first power-side independent energy storage station has officially entered commercial operation.

SHANGHAI, June 21 (Xinhua) -- U.S. carmaker Tesla on Friday inked a deal with Chinese partners to build a grid-side energy storage station in Shanghai using its Megapack energy-storage batteries.

Tesla has officially signed a \$4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.
