What is a portable power station?

A portable power station is a small battery storage generator that can be charged and provides power where and when you need it. This makes them good off-grid power sources when you need backup power during a power outage, are heading into the wilderness, or are working remotely on a job site.

Can a portable power station be turned into a solar generator?

Using DJI's solar panels, you can turn your portable power station into a solar generator. This setup provides all the unlimited energy the sun has to offer, without the noise, pollution or recurring fuel payments associated with a traditional generator.

What is the difference between a generator and a portable power station?

A portable power station is essentially a big rechargeable battery that you carry around. Deplete it, and it's useless until you can recharge. A generator, by definition, is a device that actually converts some type of energy to usable electricity in whatever circuitry you have it connected to.

How do I choose a portable power station?

Here are all the key factors you'll want to look at when deciding on a portable power station. Size: Portable power stations come in a wide array of sizes and capacities, from the small and compact EcoFlow River 3, to the more capacious Anker Solix F3800, which stretches the limits of the word "portable," despite coming with wheels.

In the last five years or so, portable fuel-powered generators and battery-based power stations have become increasingly essential in extreme weather. But power stations (i.e., solar ...
