"Our goal is to reduce our carbon footprint and create a cleaner and more efficient energy infrastructure. With this project, we are taking another step towards implementing our ...

Search across a wide variety of disciplines and sources: articles, theses, books, abstracts and court opinions.

For photovoltaic (PV) systems to become fully integrated into networks, efficient and cost-effective energy storage systems must be utilized together with intelligent demand side management.

SOF Connect signed (19-Sep-2025) a contract with Hydroenergy Company AD for the construction of a 5MW photovoltaic power plant at Vasil Levski Sofia Airport. The facility will feature ...

Understanding the Sofia outdoor energy storage power supply cost requires balancing upfront investment with long-term operational savings. With prices starting under \$500 for basic models and ...

In order to systematically assess the economic viability of photovoltaic energy storage integration projects after considering energy storage subsidies, this paper reviews ...

The results showed that mesh-grids offer a cost-effective, scalable approach for rural electrification.

SOF Connect, the concessionaire for Bulgaria's Vasil Levski Sofia Airport, and local solar power manufacturer Hydroenergy Company (HEC) have signed an agreement to construct a nearly ...

"The construction of this photovoltaic power plant is a strategic investment that will accelerate the capital's airport's transition to complete climate neutrality. Our goal is to reduce our ...

We show bottom-up manufacturing analyses for modules, inverters, and energy storage components, and we model unique costs related to community solar installations. We also account for PV ...
