Future import levels hinge on the outcome of a new US investigation into the alleged illegal import of crystalline solar cells and panels from Vietnam, Thailand, Malaysia and Cambodia.

The solar industry in the United States is booming, but domestic manufacturing is still struggling to keep up with the surging demand for solar panels. Despite significant investments in ...

In 2024, the U.S. imported 54.3 GW of solar panels, mostly from ...

Below is an interactive chart that shows solar module (panel) imports by country. The data comes from an API provided by the US Census Bureau, which is released monthly.

Data source: U.S. Energy Information Administration, Form EIA-63B, Annual Photovoltaic Module Shipments Report Note: Monthly data for 2024 are based on a subset of the largest manufacturers ...

Explore the 2024-25 global solar panel import data, highlighting the top importing countries, major importers, and key trade trends.

Countries around the world are sending millions of solar panels to meet the fast-growing demand for clean energy, reflecting broader global solar trade trends and shifting solar panel import statistics in ...

In 2024, the U.S. imported 54.3 GW of solar panels, mostly from Southeast Asia. Learn why the U.S. still relies on imports, key trade policies, and future trends.

US solar panel imports declined 13% in 2024 amid harsh tariffs. Discover how top solar panel manufacturers are responding to rising costs and market shifts. The solar panel industry in the ...

The United States imported approximately 14 billion U.S. dollars worth of solar PV modules between January and October 2024. Almost 40 percent of these solar panels imported into ...

# Solar Photovoltaic Panel Imports

98% of PV shipments were mono c-Si technology, with 58% TOPCon. Margins for the leading PV wafer, cell, and module manufacturers continued to decline through Q1 2025, due to ...
