Our Lava heat engine is designed to harness a wide range of thermal energy from various industrial processes and turn it into a valuable commodity: electricity.

By leveraging the nearly inexhaustible and clean energy of the sun, researchers of tomorrow might concentrate intense solar rays to superheat rocks into a controllable lava flow, ...

The paper examines design and operating data of current concentrated solar power (CSP) solar tower (ST) plants. The study includes CSP with or without boost by combustion of natural gas ...

Shanghai Electric Power Generation Group is the core industry sector of Shanghai Electric Group, specializes in power generation equipment manufacturing, power generation engineering and full life ...

The 50-MW Delingha concentrated solar power tower plant located on the high-altitude Tibetan Plateau in China was developed, built, and continues to be refined by a company dedicated to...

Lava is a climate-tech startup turning breakthrough isothermal heat-engine and heat-pump R& D into real-world megawatts. Our systems pair record thermal efficiency with factory-ready ...

Critically, magma power is 24x7x365 baseload power -- providing a far superior renewable power source than intermittent wind and solar. Magma power also requires a far smaller ...
