Located in La Serena, the Chile PFV Rayador 12MW Solar Park was successfully connected to the grid in August 2023 with the installation of 20,088 ASTRO N5 modules, whose energy will be evacuated ...

Projects such as the FASat-Delta, the successor of the FASat-Charlie; and Universidad de Chile's Suchai satellites have showcased Chile's growing prowess in this field.

In June 2014, the 100-megawatt (MW) Amanecer Solar CAP, a photovoltaic power plant located near Copiapó; in the Atacama Desert was inaugurated. It was developed by the company with the same name, Amanecer Solar CAP, and was the largest in Latin America at the time. It is capable of generating 270 gigawatt-hours (GWh) of electricity per year.

Swedish Space Corporation (SSC) installed a solar panel park at its satellite station facility in Santiago, Chile. The company has a goal to reach zero carbon dioxide emissions by 2040, and the ...

The most recent is 624 new solar panels at the company's satellite station facility in Santiago, Chile. The new power source is now supplying the facility with green electricity. The solar ...

Among them is a 6,450-square-foot clean room for satellite manufacturing under strict environmental controls. There, engineers plan to assemble seven 50-pound microsattellites and one ...

The pioneering facility, expected to begin operations in December, will mark the country's entry into satellite manufacturing and the independent development of space technology.

With a target to achieve 100% renewable energy by 2050, the Chilean market has attracted a diverse array of international and local solar companies. This 2025 list ranks the top players based on project ...

Partnering with Chilean solar developer Travesía Solar, Canadian Solar will supply an impressive 912 MWh energy storage system to be seamlessly integrated with the 600 MWp Santa ...
