The Solar Photovoltaics Supply Chain Review explores the global solar photovoltaics (PV) supply chain and opportunities for developing U.S. manufacturing capacity.

Key policies that promote local manufacturing in the U.S. and the European Union will change the paradigm of the global solar power supply chain.

Section 1 provides an overview of the global solar PV supply chain.

This special report examines solar PV supply chains from raw materials all the way to the finished product, spanning the five main segments of the manufacturing process: polysilicon, ingots, wafers, ...

Tracking the Buildout of the U.S. Solar Supply Chain With this map, you can filter by product type and facility status, as well as create a drive-time radius from any map point to explore geographic ...

The analysis covers supply, demand, production, energy consumption, emissions, employment, production costs, investment, trade and financial performance, highlighting key vulnerabilities and ...

This special report examines solar PV supply chains from raw materials all the way to the finished product, spanning the five main segments of the manufacturing process: polysilicon, ingots, ...

Significant wafer and cell capacity has been announced over the past 3 months, although the announced capacity is still below what would be needed to meet even 2021 deployment via a ...

NLR conducts detailed supply chain analysis for specific photovoltaic module technologies. These analyses include production locations, supply chain risk and costs, and material ...
