As a solar downturn began in the past year, some Spanish companies sold existing plants to foreign investors.

A 15 MWe solar-only power tower plant, the Solar Tres project, is in the hands of the Spanish company SENER, employing molten salt technologies for receiving and energy storage.

Get to know the projects' power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of the developer, year of connection to the ...

The midday price trough is a growing problem for solar producers and the wider Spanish power system, according to Endesa CEO José Bogas. "We will see huge [price] volatility during this ...

TotalEnergies is building a competitive portfolio that combines renewables (solar, onshore wind, offshore wind) and flexible assets (CCGT, storage) to deliver clean firm power to its ...

Explore streamlined approvals, tax incentives, and sustainable financing options that make Spain a prime investment destination for solar and renewable projects.

As Spain strives to meet its renewable energy targets outlined in the PNIEC 2023-2030 framework, the influx of large-scale solar projects reflects both strong investment interest and a ...

The \$40 million office tower, being constructed on a 1,043 square metre site at 550-558 Spencer Street in the Victoria capital of Melbourne will be fitted with a building ...

Spain's solar market is experiencing significant growth, creating a wave of project and investment opportunities worth watching. With a combination of natural resources, policy stability, ...

In 2023 and 2024, Spain added more solar power capacity than any other European country except Germany, whose economy is more than twice its size. Aggressive bidding between ...

OverviewSolar thermal power plantsTimeline of developmentsPhotovoltaicsPolicies, laws and incentivesResearch and developmentExternal linksIn March 2007, Europe's first commercial concentrating solar power tower plant was opened near the sunny Andalusian city of Seville. The 11 MW plant, known as the PS10 solar power tower, produces electricity with 624 large heliostats. Each of these mirrors has a surface measuring 120 square meters (1,290 square feet) that concentrates the Sun's rays to the top of a 115-meter (377 feet) high tower where a solar receiver an...
