There are two main types of solar power systems, namely, solar thermal systems that trap heat to warm up water and solar PV systems that convert sunlight directly into electricity as shown in Figure below.

What Is The Photovoltaic System Diagram?Photovoltaic System Diagram: ComponentsTypes of Photovoltaic SystemsExample of A Photovoltaic System DiagramThe image represents a diagram for the production of electricity generated from a photovoltaic system. The solar radiation reaches the solar panels, or rather, the photovoltaic generator and, subsequently, the inverter transforms the continuous energy into alternating. At this point, the energy produced can be exploited in different ways: 1. the us...See more on biblus.accasoftware
