Should you invest in home battery storage?

Whether you frequently experience outages, are paying exorbitant electric bills, or simply want more energy independence, investing in home battery storage may be the solution you're looking for. You don't need a home solar panel system to reap the benefits of home battery backup.

Do you need a battery storage system?

But with residential battery storage, you can store that extra power to use when your panels aren't producing enough electricity to meet your demand. Most batteries have a limit on how much energy you can store in one system, so you may need multiple batteries if you want to have enough capacity for long-duration backup.

Why do you need a home battery storage system?

Home batteries store extra energy so you can use it later. When you only have solar panels, any electricity they generate that you don't use goes to the grid. But with residential battery storage, you can store that extra power to use when your panels aren't producing enough electricity to meet your demand.

Are batteries a good alternative to a generator?

Batteries aren't the only form of home energy storage. If you've experienced a power outage in the past, you may have already invested in a generator. But home backup batteries are becoming an increasingly popular choice over home generators.
