As the war between Israel and Iran hits the one-week mark, Iranians have spent nearly half of the conflict in a near-communication blackout, unable to connect not only with the outside world...

Internet service was partially restored in Iran on Saturday, after Tehran imposed a blackout during its war with Israel, London-based online watchdog NetBlocks said.

NEW YORK (AP) -- The streets of Tehran are empty, businesses closed, communications patchy at best. With no bona fide bomb shelters open to the public, panicked ...

Internet connectivity has been restored in Tehran after repeated Israeli war strikes had taken it out, Iran's communications minister said Wednesday.

The semiofficial Fars News Agency on Saturday said authorities restored the short messaging service (SMS) nationwide as part of a phased plan after eight days of near-total internet ...

Iran entered its 20th consecutive day of near-total internet blackout on January 28, 2026, as the Islamic Republic implements what cybersecurity experts describe as the most sophisticated ...

In Iran's capital city, the streets are empty, businesses closed, communications patchy at best. Panicked masses spend restless nights on the floors of metro stations as strikes boom overhead.

People in Tehran use their phones on Tuesday, when some internet connectivity resumed. Since partial connectivity was restored, internet traffic patterns have been very jagged, ...

The IDF struck the Islamic Republic of Iran News Network (IRINN), operated by IRIB, on Monday afternoon because the network was being used for military purposes by the Iranian Armed Forces, the...

Tehran base station communications have all been restored

Israeli aircraft have struck the headquarters of Iran's state broadcaster in Tehran, after the Israeli military told residents of the area of the capital where it is located to evacuate.
