The electricity supply system in the Russian-occupied Moldovan region of Transnistria is at risk of collapse after the halt of Russian gas flow, a high-ranking official of Moldova's Energy ...

Planned daily electrical outages throughout Transnistria -- which includes Copanca -- are currently scheduled for four hours twice a day. While the Kuciurgan power plant transitioned to coal and has ...

Moldova's Transnistria has faced mass heating, hot water, and electricity outages since the halt of Russian gas flow to the breakaway region on January 1. The cutoff came after Kyiv ...

Transnistria, the breakaway region in Moldova, imposed a second day of rolling blackouts on Saturday after a shutdown in Russian gas supplies left the pro-Moscow enclave without energy.

In the capital of Transnistria, a self-declared microstate sandwiched between Moldova and Ukraine, the festive New Year's lights have gone dark ahead of schedule. This separatist sliver of...

Local sources reported that power generation was restored after approximately one hour. The grid is currently undergoing a phased reconnection process for affected consumers. The outage ...

There are no outages in hospitals and social institutions yet. Industrial enterprises also suspended operations on January 2 due to a shortage of energy resources. On January 3, they ...

Currently, almost all industries in Transnistria are shut down, and Moldova's largest electrical plant, which is in Transnistria, is without a gas supply. The plant is switching to coal, rather ...

On 28 September 2025 elections were held in Moldova, with the ruling PAS holding onto power. Thus, Moldova began to buy more expensive electricity from Romania, while Transnistria remained without ...

Transnistria faces water supply disruptions and power outages after Russian gas cuts. Over 120 settlements

Transnistria power outages

without gas; mobile and internet outages possible.

OverviewBackgroundPreludeEnergy crisisResolutionAnalysisMoldova's unrecognized breakaway region of Transnistria stopped receiving natural gas supplies from Russia on 31 December 2024, at 19:50 EET (17:50 UTC), as a result of the expiration of Russia's five-year gas transit deal with Ukraine. This kickstarted a nationwide energy crisis; heating, hot water and gas (except for cooking in cities) were completely cut off in Transnistria, while energy tariffs in...
