With solar irradiation levels hitting 5.3 kWh/m²/day and wind speeds reaching 9 m/s in coastal areas, this North African nation could power half the Mediterranean - if it can store that energy effectively. Let's ...

As we speak, Tunisian innovators are testing sand batteries in Douz, hydrogen storage in Gabès, and even gravity-based systems repurposing old mine shafts. The energy storage revolution ...

Have its own back-up power supply system to maintain protection in the event of a loss of primary power to the fire suppression system and should self-diagnose and report the presence and general ...

Integrating wind power with energy storage technologies is crucial for frequency regulation in modern power systems, ensuring the reliable and cost-effective operation of power systems while promoting ...

This article explores how battery storage, pumped hydro, and innovative technologies can transform Tunisia's power infrastructure while addressing challenges like solar intermittency and peak demand ...

Tunisian utility STEG is planning to build a 400-600MW pumped hydro energy storage plant, for a 2029 commissioning date. STEG, or the Sociéte tunisienne de l'électricité, ...

By 2030, Tunisia plans to develop second-generation clean energies (concentrated solar thermal power (CSP), pumped storage and turbines (STEP)) to boost hydrocarbon exploration and production by ...

Eckehard Tröster and Rabea Sandherr travelled to Tunisia to present the results and findings of the project. The event was held on June, 26 th in Tunis for representatives of the Energy Ministry ...

This article explores the latest developments in Tunisia's battery storage projects, technological innovations, and how companies like SunContainer Innovations contribute to this dynamic market.
