Future import levels hinge on the outcome of a new US investigation into the alleged illegal import of crystalline solar cells and panels from Vietnam, Thailand, Malaysia and Cambodia.

But given how important these changes are to the US solar market, we thought it would be useful to publish the data publicly. Below is an interactive chart that shows solar module (panel) imports by ...

Here's a breakdown of where U.S. solar panel imports came from in 2024: Vietnam, Thailand, Malaysia, and Cambodia - These four countries remain the largest suppliers of solar ...

The United States imported approximately 14 billion U.S. dollars worth of solar PV modules between January and October 2024. Almost 40 percent of these solar panels imported into ...

US solar panel imports declined 13% in 2024 amid harsh tariffs. Discover how top solar panel manufacturers are responding to rising costs and market shifts.

The latest US tariffs on solar panels have significantly altered the trade landscape, with Southeast Asian countries such as Laos and Indonesia, whose solar panel manufacturers are ...

The Top 4 countries from which the United States imports solar panels are the same four countries in the ongoing AD/CVD investigation: Vietnam, Thailand, Malaysia and Cambodia.

Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data. The subset of respondents now must ...

In 2024, the U.S. imported 54.3 GW of solar panels, mostly from Southeast Asia. Learn why the U.S. still relies on imports, key trade policies, and future trends. The U.S. saw record-high ...

U S companies import photovoltaic panels

Key Findings and Opportunities Developing U.S. photovoltaic (PV) manufacturing could mitigate global supply chain challenges and lead to tremendous benefits for the climate as well as for U.S. workers, ...
