Statera Energy has begun operating the biggest BESS project in the UK, connected to a National Grid substation that formerly supported two coal power plants.

Statera Energy has energized Thurrock Storage, the UK's largest operational battery energy storage system (BESS). Located north of the former Tilbury coal power station, the project ...

A UK coal power station is being converted into a giant energy storage facility. Transforming a UK coal plant into a large battery aims to improve energy efficiency.

Thurrock Storage, the UK's largest battery energy storage system (BESS) developed by Statera Energy is now energised and delivering electricity to the grid. This landmark 300MW battery ...

This largest commercial solar battery energy project in UK supports the energy transition by enabling renewable integration, improving grid stability, and reducing energy waste.

Flexible energy infrastructure developer Statera Energy has energised the 300-MW/600-MWh Thurrock Storage facility, described as the largest battery energy storage system (BESS) ...

A former coal power station in South Wales is being reinvented. With one of the UK's biggest battery storage projects now taking shape, Uskmouth is stepping into the future as a hub for ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for providing the ...

National Grid has energised what is being billed as the UK's largest battery energy storage system (BESS), connecting the 300MW Thurrock Storage project to its transmission network ...

UK 750kw8400kWh energy storage power station

Battery storage is at the heart of the UK and Ireland's transition to clean power. Our battery storage sites will provide up to 3GW of flexible capacity to accelerate the transition to a net zero future.
