The UK's storage market has entered a decisive new phase - and it starts with the National Energy System Operator's (NESO) newly reformed grid connection pipeline. Following its ...

The UK energy regulator, Ofgem, has advanced 77 Long Duration Energy Storage (LDES) projects into the next phase of its "cap and floor" revenue support scheme.

Following energisation, the facility in North Yorkshire is the UK's largest transmission connected battery energy storage system (BESS). The facility is supporting Britain's clean energy ...

From mountainous pumped hydro to cutting-edge cryogenic and compressed air technologies, the UK is deploying a broad portfolio of energy storage solutions to ensure energy security, decarbonisation, ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

The research by UK independent power producer Root-Power identifies 173 BESS projects, with a combined capacity of 7.6GW, likely to benefit from changes designed to accelerate ...

These projects include a variety of storage methods such as Li-Ion batteries, flow batteries and pumped hydro storage, which releases water stored at height to turn turbines, creating...

On 10 October 2024 the UK Government gave the green light to a cap and floor scheme to help bring long duration energy storage (LDES) projects to market. LDES projects include pumped storage ...

The UK's National Energy System Operator (NESO) will offer grid connection offers up to 2035 to 283GW of projects following a reform of the process. The system operator published the ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the

Uk grid energy storage projects

appetite to develop over time. Battery storage is essential for providing the ...
