Starting July 1, 2025, European approaches to determining power supply quality parameters will be implemented in Ukraine, particularly the transition to a nominal voltage of 230/400 V.

The synchronization of Ukraine's and Moldova's electric grids to continental Europe, originally established to avoid power outages at the beginning of Ukraine's conflict with Russia, was made ...

Ukraine has introduced a preferential natural gas price of 19,000 hryvnia (387 euro) per 1,000 cubic metres (including VAT) for electricity producers operating thermal power plants, ...

The Ukraine Uninterruptible Power Supply (UPS) Market report thoroughly covers the market segmentation by KVA rating, phases, and applications.

Strains on Ukraine's energy sector through the first two winters of war were mitigated by significant reductions in demand, relatively mild weather and a major collective effort to repair damaged facilities ...

Since Russia's invasion of Ukraine in February 2022, Ukraine's energy infrastructure and power grid have been key targets of Russian attacks, aimed at weakening the country's resilience.

According to Artem Nekrasov, Acting Minister of Energy of Ukraine, the Government's objective is to stimulate electricity and heat generation in the most affected regions: "To stimulate such...

During January-March, increasing transmission to Ukraine from 0 MW to 2200 MW results in minimal price changes, with only slightly higher prices at 3300 MW. All scenarios converge by March.

The minimum/maximum price limits set by Resolution 2099 for the BM will remain unchanged and continue to apply with a maximum value of UAH 8250/MWh (~EUR195/MWh) from 7:00 to 23:00, ...

Ukraine uninterruptible power supply preferential prices

The cost disparity is especially meaningful in a country like Ukraine with domestic gas production that could flexibly supply a substantial portion of domestic power generation.
