U.S. energy officials are alarmed by the discovery of unauthorized communication devices in Chinese-made power inverters and batteries, crucial for renewable energy infrastructure.

U.S. experts have allegedly found rogue communication devices, including cellular radios, in Chinese-made solar inverters and batteries over the past nine months.

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

US energy officials are reassessing the security risks posed by Chinese-made power inverters and batteries--key components in renewable energy infrastructure--following the discovery ...

Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and batteries.

This investigative article exposes the discovery of undocumented communication devices hidden in Chinese-made solar inverters, creating unprecedented vulnerabilities in global power grids.

Unknown communication devices were found in Chinese-made solar inverters, batteries, EV chargers, and heat pumps. Experts say these rogue components could remotely shut down or ...

Cellular radios and other undocumented devices were found in solar inverters and batteries. The transition to clean energy without sufficient domestic manufacturing options has made ...

Reuters was unable to determine how many solar power inverters and batteries they have looked at. The rogue

Unauthorized shutdown of solar container communication station power supply

components provide additional, undocumented communication channels ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...
