Uruguay achieved 98% renewable electricity in just 15 years--without subsidies or aid. Discover the strategy behind it, and how EcoSync is applying this model globally.

Energy in Uruguay describes energy and electricity production, consumption and import in Uruguay. As part of climate mitigation measures and an energy transformation, Uruguay has converted over 98% of its electrical grid to sustainable energy sources (primarily solar, wind, and hydro). Fossil fuels are primarily imported into Uruguay for transportation, industrial uses and applications like domestic cooking. Four hydroelec...

With an electricity mix fed by approximately 94% renewable sources, Uruguay is already a decarbonisation pioneer. But while 46% of those sources are hydropower, 27% comes from the wind ...

Countries all over the world have announced lofty goals to reduce the emissions that cause climate change. But Uruguay actually did it. In a typical year, 98% of Uruguay's grid is ...

Ramón Méendez Galain helped Uruguay decarbonize its grid in just five years, with 98 percent of its energy coming from renewable sources.

While only about two percent of Uruguay's total energy production comes from solar sources currently, the potential for solar power in Uruguay is encouraging given the country receives ...

Held up as a case study for successfully transitioning away from fossil fuels, Uruguay now generates up to 98% of its electricity from renewable energy. The country offers lessons in ...

Countries all over the world have announced lofty goals to reduce ...

The country's strategic focus on sustainability has led to significant investments in wind, solar, and biomass energy, positioning it as a global model for renewable energy adoption.

Urux Solar Power Generation

Uruguay did what most nations still call impossible: it built a power grid that runs almost entirely on renewables--at half the cost of fossil fuels. The physicist who led that transformation...

Between 2016 and 2022, renewable energy sources accounted for an average of 94% of the country's electricity mix, demonstrating a strong commitment to sustainable energy. The breakdown of this mix ...
