Does China have a USB-C charging port?

The country operates on 220V/50Hz power and increasingly features USB-C charging ports that can eliminate adapter needs entirely for compatible devices. Arriving in China with dead devices because you brought the wrong adapter is more common than you'd think.

Do laptops need power adapters in China?

Laptop power requirements vary significantly by manufacturer and model, creating specific adapter challenges in China. MacBook users: Apple's USB-C power adapters work universally with appropriate plug adapters, but older MagSafe chargers may need specific Type I converters.

What type of power outlet is used in China?

The most common outlet in China is type I, which is the only one that's grounded. It has three flat holes, with the top two positioned at a diagonal. This three-pin design provides the safest power connection for modern electronics. Countries using Type I:

Do I need a type I plug adapter for China?

You'll need a Type I plug adapter for maximum compatibility, but here's what most travelers don't realize -- China actually uses three different outlet types (A, C, and I) across the country, and what plug adapter do I need for China depends heavily on where you're staying and what devices you're bringing.
