When is solar & storage live Vietnam 2025?

HO CHI MINH CITY, Vietnam, July 3, 2025 /PRNewswire/-- Vietnam takes a bold step forward in its clean energy transition as the country's largest renewable energy event, Solar & Storage Live Vietnam 2025, returns to Ho Chi Minh City on 9-10 July 2025 at SKY Expo Vietnam.

Can solar and wind power meet Vietnam's near-term energy needs?

Contrastingly, solar and wind power's lower capital requirements and faster development timelines are well-suited to meeting Vietnam's near-term energy needs. These projects can be implemented within months and with high certainty, unlike gas projects, which typically take four to five years to complete once financed.

Why should Vietnam invest in solar power?

Vietnam can leverage domestic solar manufacturing to meet domestic demand, implement direct power purchase agreements (DPPAs) enabling private renewable supplies, accelerate grid and battery storage infrastructure, and avoid costly LNG imports by prioritizing renewables.

Why did Vietnam increase its wind power capacity?

This increase reflects Vietnam's commitment to integrating more renewable energy sources into its grid. Under the revised PDP8 onshore and nearshore wind capacity is forecast to reach between 26,066 MW and 38,029 MW by 2030, while offshore wind capacity is projected to be 17,032 MW by 2035.
