How will 5G network development affect mobile operators in Poland?

The development of 5G networks in Poland will open sales opportunities for a wide range of products and solutions, ranging from security solutions and network products to accessories for end-user equipment. Mobile operators in Poland have been testing 5G technology and have begun preparations for building 5G networks.

Where is 5G deployed in Poland?

Operators have prioritized 5G deployments in the richest and densest parts of Poland where fiber is heavily deployed, including the Masovian (Warsaw) and Pomeranian (Tri-City) provinces.

Will Poland launch a 5G network in 2023?

The business plan for Polish 5G is yet to be developed but the goal is to launch a country-wide wholesale 700 MHz network in 2023. This is pioneering solution, yet to be consulted with the European Commission. Sales opportunities are open in Poland's 5G network development.

Is Poland ready for 5G?

Poland's mobile market is today awash with deployment activity, as operators ramp up capital spending to the highest levels in years to equip thousands of mobile sites with mid-band spectrum, accelerate the sunset of 3G networks, and lay the groundwork for launching 5G standalone (SA) in the coming years.

Orange Polska boosts its network infrastructure with new base stations, improving coverage and capacity across major cities and smaller towns, while advancing 5G technology.

Notel Poland experts decided to check the progress of 5G network development in Poland in terms of stationary users. This time, they focused their efforts on Warsaw, where they ...

Late to the game in holding a 5G auction, Polish operators are now racing to deploy mid-band spectrum in a bid to better compete for the growing premium market segment.

5G regulation and law in Poland 1. What is the state of 5G deployment in your country, and specifically of the deployment of standalone (SA) 5G networks?

Warsaw urgently needs 5G base station installation

In the years 2020-2021, we helped two of the biggest mobile operators in Poland - Orange Polska and T-Mobile Polska - carry out base station investments meant to establish 5G technology all through ...

The development of 5G networks in Poland will open sales opportunities for a wide range of products and solutions, ranging from security solutions and network products to accessories for ...

Explore Poland's path to 5G Standalone technology. We analyze the impact of spectrum auctions and the likelihood of nationwide 5G SA deployment by 2026.

The density of base stations in 5G network will be much higher than now. But the stations will be smaller and they will send a signal to the user with more precision than today - ...

In Short: Orange Poland has enhanced its network infrastructure by adding 38 new base stations in Q1 of 2024, improving coverage and network capacity for users. New stations are already ...

Warsaw, Poland, 10 September 2025 - Orange Poland has launched trials of 5G SA technology in Warsaw's Ochota district, using commercial indoor and outdoor base stations. The operator plans to ...
