The Merredin Solar Farm will generate and deliver clean, renewable electricity into the South West Interconnected System (SWIS) and in doing so make a major contribution to Western Australia's ...

Located approximately 260km east of Perth, it is Western Australia's largest completed solar plant. Its output of 274GWh of electricity annually generates enough green energy to power approximately ...

Positioned near the Port Hedland Power Station, the farm is equipped with nearly 120,000 solar panels built to withstand winds up to 288 km/h, making it resilient in Australia's most ...

The Ngarluma people in north-west Western Australia have struck a landmark deal to construct a solar farm that will deliver jobs and economic growth in their community. The ...

The Three Springs Hybrid Project by Trina Solar is a groundbreaking initiative featuring a 400MW solar farm paired with a 400MW/1600MWh battery energy storage system (BESS), designed to meet the ...

The Potentia Energy Greenough River 1 and Sun Energy Merredin solar farms in Western Australia have topped Rystad Energy's leaderboard for best performance in March 2025.

Discover Australia's largest solar projects in 2025. Explore details on capacity, locations, and developers.

Murchison solar farm is an announced solar photovoltaic (PV) farm in Kalbarri, Western Australia, Australia.

The Badgingarra Solar Farm produces 19.25MW of renewable energy from 62,000 solar panels, contributing to APA's Western Australia Renewables Precinct and powering over 6,000 homes.

Explore expert solar farm design, installation & setup across Western Australia. From 1MW PV parks to large-scale photovoltaic plants. Choose Westsun today.
