Basestation is a cloud-based software solution built for waste haulers to manage their scheduling, routing, dispatching, dumpster tracking, and billing.

The container was built with advanced ballistic protection that is integrated into the structure in such a way that the weight of the container remains as low as possible. The Base Station Container CL-400 ...

You could also use a variety of containers. For items of small volumes (think like, blueprints or relic loot), you can use a regular expandable container, for example.

Containers can not be put into other containers, therefore it is impossible to build any kind of "folder tree". Items inside a container can not be repackaged, repaired, contracted, sold or ...

The containers are not locked, the materials inside of them are not locked, everything is unlocked. But for some reason they can't use the materials inside the warehouse container.

This is a Station Container. It is fitted with a password-protected security lock and computerized inventory auditing. Although the construction of a Station Container is much like that of other Cargo ...

Although the construction of a Station Container is much like that of other Cargo Containers a Station Container is far too big to fit in a ship's cargo hold and is only used for storage and inventory ...

There is a production storage (with produce from the station), there is a build storage (to build new components) and there is storage to wich you can order transports to dump their cargo.

It explains how to choose and establish a "base" for running regular missions efficiently in a particular system in highsec. Setting up bases is also a way to get very familiar with an area.

Outlines the contents of the CTC11 Base Station container, including the iCON gps 160 SmartAntenna,

What s in the base station container

CGA100 GNSS antenna, Field Controller, power accessories, antennas, and mounting components ...
