What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

What is Europe's approach to 5G?

Europe's approach to 5G has been more balanced. By 2023, the continent had around 500,000 active base stations, with countries like Germany, the UK, and France leading the way. Unlike China and the U.S., Europe has emphasized widespread but steady deployment, focusing on balancing urban and rural connectivity.

Is 5G sluggish in Europe?

The deployment and adoption of 5G SA in Europe remain sluggish, increasing slowly from a very low base and further widening the region's gap with North America and Asia. Spain stands out as a clear leader in 5G SA deployment, reaching an 8% Speedtest® sample share compared with the EU average of just 1.3% as of Q2 2025.

What is the European Commission's 5G strategy?

From a policy perspective, the European Commission has placed 5G at the core of its competitiveness strategy, closely linking coverage availability, timely spectrum assignment, and vendor diversity to productivity gains and strategic autonomy.

Introduction The European Round Table for Industry (ERT) and Global Counsel have undertaken a review of available data to evaluate progress in rolling out 5G, focusing on a ...

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and ...

The EU Commission's 5G action plan has set a 2030 target for operators to bring 5G mobile networks to all populated areas, while many non-EU nations have set similar targets for the ...

Which two 5G base stations in Europe have achieved 2MWH

European 5G scoreboard If you missed you miss the European 5G Observatory Stakeholders" Workshop in last September 2022: have a look at the latest 5G developments overview on their ...

The latest quarterly report on progress in the development of next-generation mobile infrastructure and networks was made available by the European 5G Observatory. This is the 16th ...

Discover how spectrum policy and strategy shape 5G coverage across Europe, with Nordic and Southern nations leading and Spain ahead in 5G SA.

5G technology is expanding faster than anyone could have predicted. More countries, companies, and telecom providers are racing to build 5G base stations, ensuring faster speeds, lower latency, and ...

The 5G Observatory online platform provides the latest news and key trends in 5G deployment in Europe and world-wide and its quarterly reports provide snapshots, including ...

Premium Statistic Number of 5G base stations per 100,000 people in selected countries worldwide 2024
Premium Statistic Number of 5G base stations in European Union (EU) countries 2024

As of 2024, Germany had the most 5G base stations among European Union (EU) member states, with over ***** base stations installed.
