Some local farmers hope that the USDA's decision to stop funding these solar projects will help protect farmland. Large-scale solar projects on farmland have been controversial in Delaware ...

(The Center Square) - The U.S. Department of Agriculture will no longer subsidize large-scale solar projects placed on farmland or use solar panels manufactured by foreign adversaries in any...

"We can't afford to lose [farmland] to foreign-made solar panels," said Sen. Bill Hagerty (R-Tenn.), a former USDA trade negotiator under President Trump. "For generations, Tennessee ...

U.S. Secretary of Agriculture Brooke Rollins has announced that USDA will no longer fund taxpayer dollars for solar panels on productive farmland or allow solar panels manufactured by ...

Solar panels have become a way for some struggling farmers to make ends meet. But federal hostility to renewable energy is threatening this lifeline.

Driven by subsidies, mandates and federal and state policies compelling the use of more renewable energy, solar energy facilities are now displacing farmland at an increasing rate.

WASHINGTON, D.C. - Today, Congressman Andy Harris (MD-01) applauds U.S. Secretary of Agriculture Brooke Rollins for ending the use of taxpayer dollars to fund solar projects ...

Solar can also provide an economic cushion for farmers, who often operate on thin and unpredictable margins. The new fees will have to be approved by the legislature before they can take ...

I applaud President Trump and Secretary Rollins for standing up for America's farmers and ranchers by ensuring our prime farmland is protected from foreign adversaries and our taxpayer ...

Will farmers be compensated for demolishing photovoltaic panels

According to a report by the Office of Tax Analysis at the Treasury Department, renewable subsidies -- including wind and solar -- will cost taxpayers \$424.6 billion over the next decade. Tiffany first ...
