Wood Mackenzie's October 2025 analysis confirms that PV module prices are jumping approximately 9% in Q4 2025, with further increases expected through 2026. This isn't a temporary blip.

Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The oversupply that helped to push prices down last year has eased a...

In order to continue using the current power pricing mechanism, some companies might rush to install PV systems before 1 June 2025, potentially leading to a surge in demand and an increase in...

The impact is already being felt across the market, with experts forecasting a 10-15% increase in panel prices, tightening supply chains and triggering pre-buying worldwide.

Overseas solar panel buyers are facing price increases as Chinese manufacturers look set to pass on higher costs to customers amid rising silver prices and the impending withdrawal of an...

A leading module manufacturer told OPIS that while cost pressures are genuine, the sustainability of price hikes remains uncertain, pending further policy clarity and downstream market responses.

For now, opportunistic price increases linked to new tariffs are being observed, while Chinese producers explore shifting cell production to Africa to bypass restrictions.

(Yicai) Feb. 26 -- Several leading Chinese photovoltaic companies have confirmed to Yicai that they hiked solar module prices after demand for the products recovered.

Explore 2025 solar PV panel price trends driven by tariffs and monocrystalline demand. Discover seasonal buying patterns and cost strategies. Click for actionable market analysis.

Will the price of photovoltaic panels continue to rise Zhihu

In the third quarter (Q3) of 2024, module prices rose 1% but stayed near record lows, around \$0.10/ Watt direct current (W dc), as substantial module overcapacity continues to depress prices.
