While NFPA 855 is a standard and not a code, its provisions are enforced by NFPA 1, Fire Code, in which Chapter 52 outlines requirements, along with references to specific sections in NFPA 855.

In this final rule, the Federal Energy Regulatory Commission (Commission or FERC) is amending the Uniform System of Accounts (USofA) for public utilities and licensees to: create new ...

By Nov. 4, NERC plans to file proposed reliability standards to address performance requirements and post-event performance validation for registered IBRs. By November 2025, it plans ...

Integrating wind power with energy storage technologies is crucial for frequency regulation in modern power systems, ensuring the reliable and cost-effective operation of power ...

Consistent with other IBR proceedings, FERC defines IBRs to include solar photovoltaic, wind, fuel cell, and battery storage resources powering electronic devices that change direct current ...

The Pumped Storage Hydropower Wind and Solar Integration and System Reliability Initiative is designed to provide financial assistance to eligible entities to carry out project design, transmission ...

DNV has developed an accredited certification approach which aims to accelerate a safe and sound implementation of electrical energy storage systems, by providing a framework for certification of ...

On May 18, 2023, the Federal Energy Regulatory Commission (&quot;FERC&quot;) took one more step in its ongoing efforts to enhance and protect the reliability of the bulk power system by approving a work ...

CSA Group standards address solar photovoltaic and thermal systems, wind turbine systems, battery management and energy storage, distributed energy resources and their connection to distribution ...

# Wind Solar and Energy Storage Recognition Standard

The North American Electric Reliability Corp. last week released a nearly three-year plan for developing reliability standards for inverter-based resources, or IBRs, such as wind, solar and ...
